

Ahmed Ibrahim Mohamed

Senior Flutter Developer

elsankary99@gmail.com • +20 12 85805818 • Cairo, Egypt

[LinkedIn](#) • [GitHub](#)

Summary

Senior Flutter Developer with 4+ years of experience building, maintaining, and publishing production-grade mobile applications for Android and iOS. Strong expertise in Flutter, Dart, Riverpod, Bloc, Clean Architecture, Firebase, REST API integration, localization, performance optimization, and app store deployment. Experienced across fintech, healthcare, ride-hailing, sports, beauty, and social platforms, with ownership of mobile architecture, feature delivery, release management, and cross-functional collaboration.

Experience

Senior Flutter Developer at [REYADA CAPITAL](#), Dubai, UAE

October 2025 - Present

- Lead mobile development for 2 production Flutter applications across Android and iOS, owning architecture, feature delivery, release preparation, and post-release optimization.
- Designed scalable mobile architecture using Clean Architecture, Riverpod, and modular feature structure, improving maintainability across multiple app modules.
- Integrated RESTful APIs, Firebase services, authentication flows, real-time updates, and third-party SDKs across core product features.
- Delivered and maintained key mobile features across fintech/investment products, collaborating with backend, UI/UX, and product teams from planning to production release.
- Improved code quality by introducing reusable widgets, structured state management, and cleaner feature separation across the mobile codebase.
- Supported production releases through testing, bug fixing, store deployment preparation, and monitoring post-release stability.

Mid-Level Flutter Developer at [Rizme](#), October, Egypt

December 2023 - September 2025

- Built and maintained multiple production Flutter applications for Android and iOS across healthcare, ride-hailing, booking, sports, and social networking domains.
- Implemented core features including push notifications, deep links, maps, payment flows, multilingual support, authentication, and Firebase integrations.
- Contributed to the delivery of 5+ published mobile apps, including Cyne, G.Ride, Game3at+, EnvoSports and Bookly.
- Worked closely with designers and backend engineers to convert product requirements and UI designs into stable, scalable mobile features.
- Improved app maintainability by applying Clean Architecture, Riverpod-based state management, reusable components, and consistent feature structure.

Junior flutter developer at Freelancing

February 2023 - November 2023

- Delivered end-to-end Flutter mobile applications for freelance clients, mainly focused on e-commerce and shop-related solutions.
- Built complete mobile flows including UI implementation, authentication, product browsing, cart/order flows, API integration, state management, and navigation.
- Used Riverpod, Bloc, Firebase, REST APIs, and Clean Architecture to build scalable and maintainable client applications.
- Published client apps to Google Play and Apple App Store, handling release preparation, store requirements, and post-release fixes.

Skills

Mobile Architecture & State Management: Clean Architecture, SOLID Principles, MVVM, Design Patterns, BLoC, Cubit, Riverpod, Provider, Feature-Based Modular Architecture, Dependency Injection, Service Locator

Mobile Development & Platforms: Cross-Platform Mobile Development, Android Development, iOS Development, Java (Basic), Swift (Basic), Objective-C (Basic), Responsive UI Development, Adaptive Design, Custom Animations, Material Design, Cupertino Design, App Publishing, Google Play Deployment, App Store Deployment

Performance, Security & App Features: Performance Optimization, Memory Management, Push Notifications, Deep Linking, Google Maps Integration, Location Services, Camera & Media Handling, In-App Purchases, Localization & Internationalization, Production Applications, Reusable Libraries, Package Creation

Tools, CI/CD & Deployment: Git, GitHub, Git Flow, GitHub Actions, Codemagic, CI/CD Pipelines, Fastlane, Android Studio, VS Code, Xcode, Postman, Firebase Console

Software Engineering Practices: Agile/Scrum Methodologies, Requirement Analysis, Technical Decisions, Teamwork, Cross-functional Collaboration, Excellent Communication, Strong Problem-solving Skills, Mentoring Junior Developers

Testing & Code Quality: Unit Testing, Widget Testing, Integration Testing, Test-Driven Development (TDD), Debugging, Code Reviews, Coding Standards, Clean Code Practices, Project Documentation

Backend, API Integration & Networking: RESTful APIs, API Integration, Dio, Retrofit, GraphQL, Networking Libraries, Firebase (Authentication, Firestore, Cloud Messaging (FCM), Analytics, Crashlytics), WebSockets, Real-time Features, Third-party SDK Integration, Payment Gateway Integration

Software Engineering & Soft Skills: Agile/Scrum Methodologies, Requirement Analysis, Technical Decisions, Teamwork, Cross-functional Collaboration, Excellent Communication, Strong Problem-solving Skills, Mentoring Junior Developers

Local Data Storage & Asynchronous Programming: SQLite, Hive, SharedPreferences, Secure Storage, JSON Serialization, Asynchronous Programming, Futures, Streams, Isolates, Background Services, App Lifecycle Management

Projects

Cyne | Cyne HCPs — Healthcare & Medication Management • [App Store](#) • [Play Store](#)

- Developed mobile features for patient medication tracking, smart reminders, scanning, and adherence monitoring.
- Built doctor/pharmacist-facing flows for referrals, patient support, and reward-based engagement. Worked on healthcare-focused UX requiring reliability, clarity, and safe user interaction

G.Ride — Ride-Hailing App • [App Store](#) • [Play Store](#)

- Developed ride-booking features including scheduling, driver tracking, fare estimation, ratings, and multilingual support.
- Integrated maps, location tracking, payments, and safety-related features such as emergency support.

Bookly — Beauty Booking Platform • [Bookly](#) • [Bookly Provider](#)

- Built customer and provider app features for booking beauty services, managing schedules, and handling appointments.
- Supported provider-side business management flows.

Invesier — Social Trading Platform • [App Store](#) • [Play Store](#)

- Built Flutter features for a social trading app connecting traders and investors.
- Implemented live trading challenges, market updates, educational sessions, and social interaction features.
- Integrated APIs and real-time app flows to support user engagement and trading-related content.

EnvoSports — Sports Networking Platform • [App Store](#) • [Play Store](#)

- Developed features for athlete profiles, media sharing, progress tracking, and sports community visibility.
- Supported multi-sport use cases including handball, basketball, and volleyball.

Al Rubban Marine — Boat Maintenance & Service Management Platform • [App Store](#) • [Play Store](#)

- Developed a professional marine service application enabling boat owners to manage boats, request customized maintenance services, schedule on-site or center-based repairs, and track service progress.
- Implemented scalable Flutter features using Clean Architecture, Riverpod, REST API integration

Education

Bachelor's Degree at Mansoura University, Mansoura, Egypt

Languages

Arabic - Native

English - Conversational
